

Metal-Box Kit

February 2008

Complete the commercial projects rough-in stage faster with metal-box solutions featuring pre-installed P&S PlugTail® Connectors. With the ground wire pre-mounted to the box and the mud ring factory-installed, this solution will reduce waste and time on the job. At device-out, simply remove the P&S PlugTail poly-bag protection and install the device. This solution gives contractors an additional P&S PlugTail option for the productivity and consistency they need to meet tough deadlines.

Benefits

- Productivity
- Reliability
- Consistency
- Fewer SKUs to order
- Less waste on the job
- Eliminates protective cover plate
- Flush device at finish

Applications

- Light commercial construction where quick and consistent installation is critical
